The screenshot shows the Curriki website interface. At the top left is the Curriki logo. To its right, a user is logged in as 'Ludovic' with links for 'Administration' and 'Logout'. A search bar is located in the top right corner. Below the navigation bar, there are social media icons and a sidebar menu with categories like 'HOME', 'FIND RESOURCES', 'PUBLISH CONTENT', 'PD WORKSHOPS', 'CONNECT WITH', 'MY CURRIKI', 'PARTNERS & SPONSORS', 'HELP', 'ABOUT CURRIKI', and 'SOCIAL NETWORKS'. The main content area is titled 'XWiki Training Group' and includes tabs for 'Home', 'Messages', 'Curriculum', 'Members', and 'Documentation'. A modal dialog box titled 'ADD TO CURRIKI' is open, asking 'What would you like to add?'. It offers two main options: 'Something I already have or know about' and 'Something I want to make on Curriki'. Under the first option, there are radio buttons for 'A file from my computer' (selected), 'A video I want to play on Curriki', and 'A link for a great web resource'. A 'Parcourir...' button is next to the 'A file from my computer' option. Under the second option, there are radio buttons for 'A resource I'll create using a template' and 'A resource I'll create from "scratch"'. The dialog has 'Cancel' and 'Next >>' buttons. In the background, a list of recent activity is visible, including curriculum resource edits and new member joins. At the bottom, there is a 'FEATURED MEMBER' section for Meredith Beaton and an 'INFORMATION SETTINGS' section for the group's membership and license policies.

Developing Resources on Curriki

Contributed By: Joshua Marks

Content
Information
Standards
Comments (2)

Introduction to Resource Types

OVERVIEW OF FORMATTING & EDITING OPTIONS

TABLE OF CONTENTS

- [Using the Curriculum Builder](#)
- Curriculum Builder: Overview
- 1916 Multigraph ad OM
- Edison talking about progress
- Video Presentation on Newton's First law of Motion.
- Frog jumping logic puzzle
- The part-adder: generate difficult sums
- Curriki site version 1.3 demo movie
- Athabasca University Mobile ESL Example
- Road of Life: Elementary Health Education Curriculum, 3.0
- General Physics I
- Flash SWF examples
- Example of a generic Curriki Lesson Plan

Curriki's editing tools are designed to make it easy and fast to create and edit a hierarchical collection of resources. When you view or edit a collection on Curriki, you have a Table of Contents on the left to navigate between the different elements and levels in the collection. You also have some tabs on the top to view the Information metadata for the collection or resource being edited and for viewing the Comments on resources.

Curriki offers "Specific Displays" for editing different types of resources. For example, some resource types are:

- Wiki text blocks like this one
- HTML blocks that can contain most styles of HTML content
- Image files of web displayable format (GIF, PNG, JPEG, etc.)
- MP3 audio files
- Zip file archives- including the ability to access individual files in an archive
- Video upload and capture with streaming playback using VIDI!Talk

This collection will help to demonstrate each of these types of resources and the special display and edit capabilities for each.

Content Type	Features	Limitations
Text block	<i>styled</i> text, attached and inserted images, formatting, inserted attachments and links	Complex tables
HTML	Anything you can do in HTML, including style sheets, JavaScript (with limitations for cross site scripting) etc.	Browser issues in HTML and JS support
Image	Size, captions	Only browser displayable formats (PNG, GIF, JPEG, etc.) No TIFF or SVG support for display.
Flash/SWF	Plays in interface or in its own window	Almost no limitations for pure SWF files, but the client needs a plug-in
Audio	Supports playback in site for MP3 files	No embedded player for other formats (OGG, Windows Media, AAC etc.)
